Education

- **B.Tech in Information Technology** 2023 – 2027
Techno Main Salt Lake
CGPA: 7.87 / 10
- **Senior Secondary (Class XII)**
Municipal Girls' High School, Burdwan
Percentage: 94.43%
- **Secondary (Class X)**
Municipal Girls' High School, Burdwan
Percentage: 91.2%

Skills

- **Front-End:** HTML5, CSS3, JavaScript, EJS, Bootstrap, React
- **Back-End:** Node.js, Express.js
- **Databases:** MongoDB, Mongoose, SQL
- **Languages:** Java, JavaScript, C, Python
- **Data Science:** NumPy, Pandas, Matplotlib, Jupyter Notebook, Data Analysis
- **Problem Solving:** 200+ LeetCode problems solved (DSA, arrays, trees, recursion, DP)

Projects

- **Full-Stack Web Application: Vritti**
 - A digital mental health and psychological support system developed as part of Smart India Hackathon 2025.
 - Built using React.js, Tailwind CSS, Node.js, Express.js, and MongoDB.
 - Features include mood tracking, clinical assessments (PHQ-9, GAD-7), journaling, AI chatbot support, and role-based dashboards.
 - Implemented secure authentication, data visualization, and multilingual support.
 - GitHub: <https://github.com/ShreyaM24/Vritti>
- **AI Chatbot: ShreyaGPT**
 - Full-stack ChatGPT-inspired web application built using the MERN stack and the OpenAI API.
 - Supports real-time AI responses, multi-threaded conversation handling, and smooth state management using React Context API.
 - Backend built with Node.js and Express, handling message routing and storing conversations.
 - MongoDB used for persisting chat threads, message history, and future user accounts.
 - GitHub: <https://github.com/ShreyaM24/ShreyaGPT>
- **Project California — House Price Prediction Web App**
 - Built an end-to-end machine learning system to predict housing prices using the California housing dataset.
 - Performed data preprocessing, feature engineering, and exploratory data analysis using Pandas, NumPy, and Matplotlib.
 - Trained and optimized a Random Forest Regression model to improve prediction accuracy.
 - Developed a Flask-based web application to provide real-time predictions with an intuitive user interface.
 - Bridged the gap between ML models and real-world usability by deploying an interactive prediction system.
 - GitHub: <https://github.com/ShreyaM24/Project-California>

Achievements

- **Cleared Round 1 of TCS CodeVita**
 - Cleared Round 1 of TCS CodeVita season 13 and qualified for Round 2.
- **GSSoC'25 Contributor**
 - Contributed to open-source projects under GirlScript Summer of Code 2025. Worked on issue resolution, feature enhancements, documentation improvements, and collaborative development using Git and GitHub.
